FUTURES BANK WEBSITE SPECIFICATION DOCUMENT

1. Website Specification

Introduction

The Futures Bank website is a financial services website developed to provide customers with information about banking services, loans, online banking and investment opportunities. The website was designed as part of a student web development project following the website design process.

Purpose of the Website

The main purpose of the Futures Bank website is to:

- Provide information about banking services
- Allow customers to contact the bank
- Allow users to send feedback
- Promote digital banking services
- Present the bank as secure and professional

Target Users

The website is intended for:

- Bank customers
- Potential clients
- Students needing financial services
- Businesses looking for loans
- Individuals interested in online banking

Website Goals

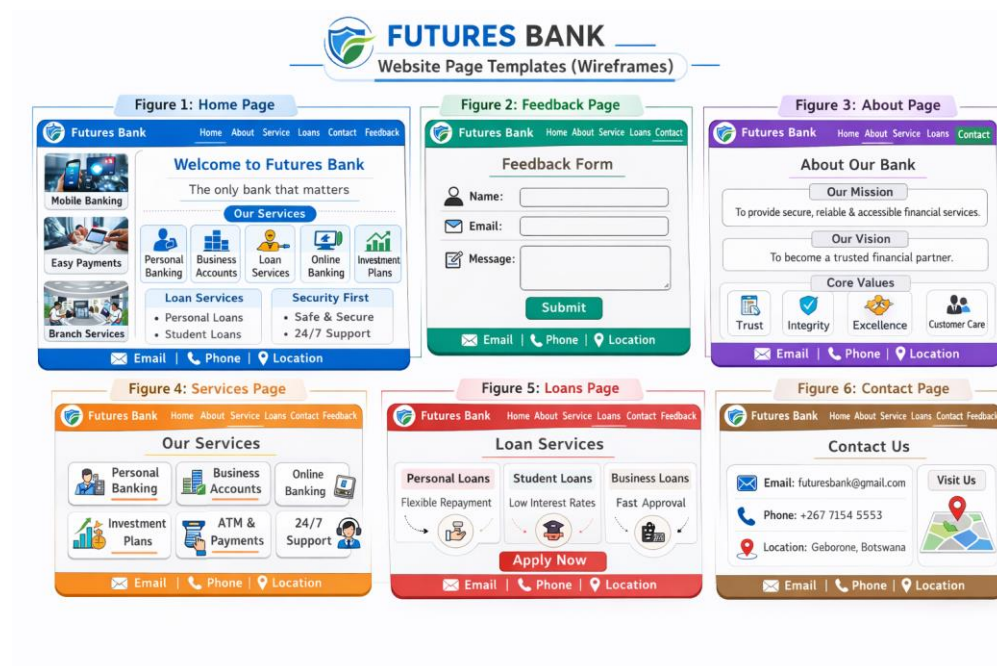

The goals of the website are:

- To create a simple and user-friendly interface

- To provide clear banking information
- To allow easy navigation between pages
- To demonstrate web development skills
- To create a professional looking banking website

2. Information Design and Taxonomy

Website Structure (Site Map)

The Futures Bank website contains the following pages:

- Home
- About
- Services
- Loans
- Contact
- Feedback

Navigation Structure

The navigation bar appears on all pages and contains:

Home | About | Service | Loans | Contact | Feedback

This ensures consistency and easy navigation.

Content Organization

Home Page

Contains:

- Welcome message
- Bank introduction
- Services overview
- Loan information
- Security information
- Banking images

About Page

Contains:

- Bank description
- Mission
- Vision

Services Page

Contains:

- Personal banking
- Business accounts
- Investment plans

- Online banking

Loans Page

Contains:

- Loan types
- Loan descriptions
- Loan benefits

Contact Page

Contains:

- Email address
- Phone number
- Location

Feedback Page

Contains:

- Feedback form
- Name field
- Email field
- Message field
- Submit button

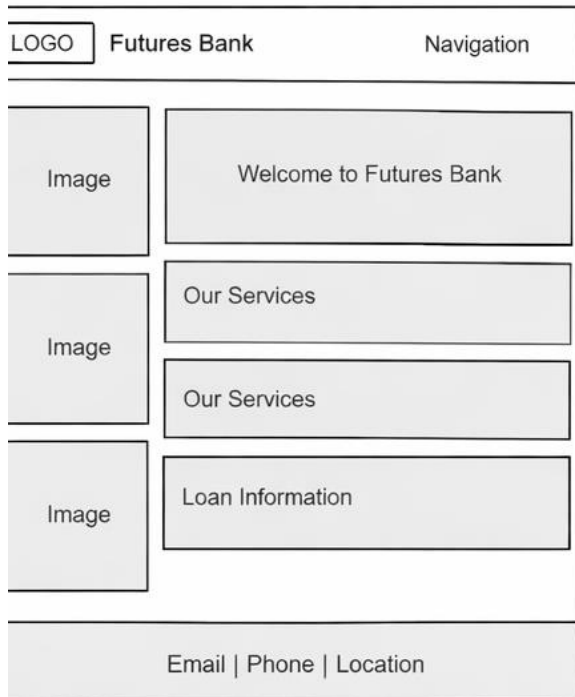

Information Categories

Information is grouped into:

- Banking services
- Financial products
- Customer support
- Company information

3. Page Template Design

Layout Structure

All pages follow a consistent layout:

Header

Contains:

- Bank logo
- Bank name
- Navigation menu

Main Content Area

Contains:

- Page specific information
- Images
- Text content

Footer

Contains:

- Email

- Phone number
- Location
- Copyright information

Design Features Used

The website uses:

- Blue color theme (represents trust and finance)
- Clean layout
- Rounded images
- Structured sections
- Clear headings
- Professional typography

Design Principles Applied

The design follows:

- Consistency (same navigation and footer)
- Alignment (organized layout)
- Spacing (clean layout between images)
- Simplicity (easy to read content)
- Visual hierarchy (headings and sections)

4. Technical Brief

Technologies Used

The website was developed using:

- HTML (structure)
- CSS (styling)
- Basic JavaScript (forms if used)

Tools Used

Development tools included:

- Visual Studio Code

- Web browser testing
- Image editing tools

Key Technical Features

The website includes:

- Navigation bar shared across pages
- Footer shared across pages
- Image styling
- Form design
- Responsive layout basics

File Structure Example

Project structure:

FuturesBankWebsite

```
|
|— index.html
|— about.html
|— services.html
|— loans.html
|— contact.html
|— feedback.html
|— style.css
|— images folder
```

Compatibility

The website was tested on:

- Google Chrome
- Microsoft Edge

5. Quality Assurance

Testing Performed

The following tests were done:

Navigation testing:

- All links open correct pages

Design testing:

- Images display correctly
- Layout remains consistent

Form testing:

- Feedback form accepts input

Content testing:

- Text displays correctly
- No broken images

Problems Found

Some challenges included:

- Image alignment issues
- Spacing problems
- Footer positioning
- Layout overlap issues

Solutions Applied

Solutions included:

- CSS spacing adjustments
- Image resizing
- Float clearing
- Layout restructuring

6. Publishing and Promotion

Publishing Method

The website can be published using:

- GitHub Pages
- Netlify
- Local hosting
- College submission platform

Promotion Strategies

The website could be promoted through:

- Social media
- Email marketing
- Online advertisements
- Search engine optimization
- Word of mouth

Maintenance Plan

The website would require:

- Content updates
- Security updates
- Feature improvements
- Bug fixes

7. Future Development

Future improvements may include:

- User login system
- Online account creation
- Loan application forms
- Database integration
- Mobile responsive design
- Dark mode
- Chat support
- Transaction simulation
- Admin dashboard
- Real online banking system

Conclusion

The Futures Bank website successfully demonstrates the website design process from planning to development. The website provides structured banking information, clear navigation and a professional layout. Future improvements could transform it into a fully functional banking platform.
